

# FLAME

As EBIS enters its 10th year, we are proud to introduce a new beginning as we strive to continue with the educational excellence that our students deserve. This year we added a new class to our existing strong, well-established Egyptian Model IGCSE department. Based on a UK style approach, this class follows more closely with the KS3 approach running along the lines of traditional UK Key Stage 4 and Sixth Form provision.

This new class experience known as FLAME: Future Leaders Alongside Moral Excellence provides our students with a chance to excel with little to no outside help. They have full time schedules with lots of extracurricular activities, clubs and community service. These experiences will not only shape our students' future of success but also allow them to define the individual they are and wish to aspire to.

Our amazing students will not only have the opportunity to study all the core subjects but also the chance to study IGCSE English as a First Language, English Literature, Physical Education as well as all the creative arts. Part of the curriculum is to take a little bit of Accounting, Business, Sociology, History, Geography, Economics and Psychology, even if they choose not to take the entire IGCSE course, in order to broaden and enrich their learning experience and knowledge.

Our teachers are dedicated, hardworking, and available full time. The effort they put in with our students is sincere and consistent. Our students follow a comprehensive and well-rounded schedule of study that will allow them to choose the university and career of their dreams.

We have created a crisp classroom environment that will help inspire and motivate our students to be proud of who they are. We wanted a classroom that is unlike any other; a place where students feel at home and comfortable.

Mrs. Deena Favez teaches Chemistry to our FLAME students and when asked how she feels about being part of FLAME she said, "I feel so lucky to be taking part in such a life changing experience for these kids. I know that I am helping them take charge of their future. My motto is: be the best you can be!"

Mrs. Laila Sobhy teaches Maths to our FLAME students and is also the head of the Maths department at EBIS. She feels that because these students are handpicked based upon academics and behaviour, "the teaching environment is ideal and allows for proper learning and teaching to take place along with differentiation. I get the chance to actually teach these students rather than just make them memorise information for an exam like some other IGCSE schools."

Roaa Tarek Eid is a current student in the year 10 FLAME class and has been at EBIS for three years. When asked why she chose FLAME she answered, "FLAME felt like the right choice for me because it is organised, there are no

part time teachers, you feel loved and appreciated, and you know your teachers want the best for you. "

Farida Mostafa Shaker is also a current student in the year 10 FLAME class and has been at EBIS for 10 years."I chose FLAME because I want to be in an organised learning environment and have my afternoons free for myself rather than going to tutoring centres. Here I have teachers who know who I am, my strengths and weakness, and can cater to my individual needs. Overall, I have a better level of education."

FLAME is a pioneer in a proper Key Stage 4, well rounded education. With FLAME, the possibilities are endless.
